

Sit Collection – Stools
 Design by Andrés Bluth, 2010
 Bivaq, Spain

The sit stools offer the clean lines of the sit collection in two height options. The solid aluminum sheet metal structure and "skate" style leg gives the Sit collection a contemporary design and a superior resistance to the elements.

The Sit collection is comprised of modular sofas, dining chairs, armchairs, coffee tables, bar stools and pedestal base tables. Each component is made from extruded aluminum, and finished with polyester paint. All the materials used (structure, fabric) are suitable for outdoor use, and are resistant to weathering and sunlight.
